

ARBAZ SAYYAD

Software Engineer - Backend | Java | Spring Boot | Microservices

☎ +91 9834239709 | 📍 Pune, India | ✉ arbazsayyad.dev@gmail.com | [in/arbaz-sayyad](https://in.linkedin.com/in/arbaz-sayyad) | 🌐 /Arbaz4Sayyad | 🌐 Portfolio

PROFESSIONAL SUMMARY

Backend Software Engineer with **2.5+ years** of experience building scalable applications using **Java**, **Spring Boot**, **Kafka**, and **Redis**. Experienced in building backend systems with asynchronous workflows, caching, distributed messaging, and secure REST APIs. Contributed to **Spring Kafka** and **Spring Framework** open-source projects, focused on backend architecture and scalable platforms.

TECHNICAL SKILLS

Programming Languages: Java, SQL, JavaScript

Backend: Spring Boot, Spring MVC, Spring WebFlux, Spring Security, Hibernate/JPA, REST APIs, gRPC

Distributed Systems & Messages: Apache Kafka, Event-Driven Architecture, DLQ, Fault Tolerance, Redis

Databases: PostgreSQL, MySQL, MongoDB

Cloud & DevOps: AWS (EC2, S3, RDS), Docker, Kubernetes, Jenkins, CI/CD

Observability & Security: Prometheus, Grafana, ELK Stack, OAuth2, JWT, RBAC

Engineering Practices: Data Structures & Algorithms, Low-Level Design, System Design, TDD, Agile/Scrum, Code Reviews, Git

PROFESSIONAL EXPERIENCE

Software Engineer – Backend

AJ TechSoft

Jan 2024 – June 2026

Pune, India

- Developed backend APIs and asynchronous services using **Java**, **Spring Boot**, and **Kafka** for internal workflow automation systems.
- Reduced API response time by nearly **30%** using **Redis caching** and query optimisation to minimise repeated database access.
- Implemented **Kafka-based** asynchronous workflows with retry & **DLQ** handling to improve fault tolerance in background processing.
- Reduced database query latency by **30–40%** through composite indexing, query tuning, and fixing **N+1 issues** in JPA.
- Implemented **JWT authentication**, **RBAC**, and **OAuth2** using Spring Security for secure service communication.
- Added unit and integration tests for REST APIs and Kafka consumers using **JUnit** and **Mockito** to improve reliability.

OPEN SOURCE CONTRIBUTIONS

Spring Kafka | Java, Apache Kafka, Distributed Systems

- Contributed fail-fast validation support for **@RetryableTopic** in Spring Kafka to catch consumer configuration issues earlier and improve reliability. [\[PR #4397\]](#)

Spring Framework | Java, WebFlux, Spring MVC

- Extended **ModelAttributeMethodArgumentResolver** to support custom validation in **Spring WebFlux**, bringing reactive behaviour closer to **Spring MVC** extensibility standards. [\[PR #36697\]](#)
- Improved documentation and behaviour clarity for transaction management in **multi-transaction-manager** setups. [\[PR #36689\]](#)

PROJECTS

CollabMatrix - Collaboration Platform | Spring Boot, Kafka, Redis, WebSockets, MongoDB, Docker [\[Demo\]](#) [\[GitHub\]](#)

- Built a real-time collaboration platform using **WebSockets** with Dockerised and **Kubernetes-ready** backend services.
- Implemented **Kafka-based** event workflows with partition-aware messaging and Redis-backed deduplication for reliable notifications.
- Added **optimistic locking** and **rate limiting** to prevent task conflicts and backend resource exhaustion.

AI Meeting Notes | Java, Spring Boot, React, PostgreSQL, Kafka, Redis, Gemini API, Docker [\[Demo\]](#) [\[GitHub\]](#)

- Built an AI meeting assistant that generates meeting summaries and action items using **event-driven** asynchronous workflows.
- Designed **retry scheduling** and failed-job recovery workflows to prevent silent processing failures during AI tasks.
- Integrated **Gemini API** and **Redis caching** for automated summaries and concurrent request handling.

LinkMagic - URL Shortener | Spring Boot, React, Base62, MongoDB, Redis, Docker [\[Demo\]](#) [\[GitHub\]](#)

- Built a URL shortener using **Base62 encoding** and **Redis caching** for low-latency short-link generation and redirect handling.
- Reduced repeated database lookups during redirects by caching frequently accessed URLs in Redis.
- Designed indexed analytics queries for low-latency tracking of clicks, devices, browsers, and geolocation insights.

EDUCATION

Master of Computer Application (MCA)

Zeal Institute of Business Administration, Computer Application & Research

Aug 2022 – May 2024

Pune, India

– **CGPA:** 8.25

– **Relevant Coursework:** Data Structures & Algorithms, Object-Oriented Programming, DBMS, Computer Networks

ACHIEVEMENTS

- **Open Source Contributor:** Merged pull requests in Spring Kafka & Spring Framework [\[GitHub\]](#)
- Implemented Swagger/OpenAPI documentation across backend services to simplify API integration and reduce manual testing effort.
- Built a containerised **9-service Docker Compose** development stack for reproducible local setup and testing.
- Published two peer-reviewed research papers (IJNRD): [E-Commerce](#) & [Cyber-Crime Awareness](#)
